

OCCUPATIONAL SAFETY AND HEALTH

Basic Safety Training

BACKGROUND

Global competition requires industry participant in Indonesia to intensify the implementation of Occupational Safety and Health (OHS) programs. World-class companies have even made OSH success indicators as one of the factors that can increase competitiveness in the global market. The success of improving the implementation of the OHS program within the company certainly cannot be separated from the ability or competence of the OHS program implementers. OHS experts who have competence in accordance with the National Occupational Competency Standards (SKKNI) for OHS are needed to ensure effective and appropriate implementation.

PURPOSE

The training organized by LTC UPB is designed with reference to the SKKNI K3 and aims to improve the competence of OHS personnel according to existing standards.

TARGET PARTICIPANTS

Students, lecturers, employees, and public in general.

GRADUATE COMPETENCIES

- Understand the OHS laws and regulations.
- Understand the elements of OHS Management System.
- Able to carry out the coordination and maintenance of OHS management system.
- Able to create rankings and risk matrices.
- Able to make accident report.
- Understand the emergency response organization and system.
- Able to explain OHS programs.

TRAINING AND CERTIFICATION

Occupational Safety and Health Training and Occupational Safety and Health Personnel Certification are carried out within a period of four (4) days. At the end of the training and certification, participants who are considered competent will be given a certificate issued by LTC UPB. Certificates are recognized nationally and can be used as a proof of participants' competence in the field of OHS.
